Breeds of Cattle, 2nd Edition

by

***Herman R. Purdy, R. John Dawes, Dr. Robert Hough
with Revisions by Don Hutzel***

Foreword by Holstein U.S.A.'s CEO John M. Meyer

The highly-anticipated second edition of Herman Purdy's classic 1987 *Breeds of Cattle* is now available for same day shipping. Completely revised, updated, and expanded text by John Dawes and Dr. Bob Hough includes twelve additional breeds, bringing the grand total to forty-five with a page count of 400. The new edition is fully illustrated with over 400 color and B & W images, including reproductions of rare historic 19th century paintings depicting what the older breeds might have looked like as well as modern ideal full-color formal portraits of a mature bull and cow of each breed to complement the thorough and engagingly written text. The book's breed association authorized documentation includes the history, origin, and phenotype of each breed, as well as current statistics.

Here is what people are saying about the 2nd Edition of *Breeds of Cattle*:

"This is an art book that's both beautiful and instructive. It's a fun reference that you'll definitely want on your coffee table."

--Joe Roybal, Editor, BEEF magazine--

"If you love cattle and cattle breeding, then you will treasure this book."

--Lee Leachman, Leachman Cattle of Colorado--

"This is the most complete & informative book of its kind and every university, high school, public and private library should possess this unique book to educate the young and old."

--Frank Graves, Virginia Department of Agriculture and Consumer Services--

"This beautiful book is an absolute classic cattle reference & is a must for any cattleman's library."

--Glen Klippenstein, CEO of the American Chianina Association--

"This book is a must, I highly recommend it to anyone who has ever had an interest in cattle"

--Raul Tellez, New Mexico Department of Agriculture--

"This magnificent book simply cannot be perused casually. Open it anywhere, surrender to the joy of fine historic and contemporary paintings, then settle in for compelling discussions of bovine genetics, history, and geography."

--Jay Dusard, photographer/author, *The North American Cowboy: A Portrait, Open Country, and Horses*--
